PROFILE

Engineer with **15+ years** spanning hardware repair, the Google advertising ecosystem, content production and AI automation. I work end to end — from a failed solder joint, to a broken conversion funnel, to an agent pipeline that has to run unattended overnight. Currently a Senior Process Analyst in content review and policy enforcement; in parallel I design and self-host AI-assisted tooling. **Driven by pure curiosity.**

EXPERIENCE

Senior Process Analyst

NOV 2019 — PRESENT

Cognizant Technology Solutions · Kraków, Poland

- Review and analyse content at scale against policy, legal and regulatory requirements.
- Identify non-compliant material and turn recurring findings into scoped process improvements.
- Deliver weekly quality and productivity targets backed by data analysis and reporting.
- Apply market-specific knowledge to spot and scope solutions that improve user-community support.
- Operate under strict confidentiality and zero-trust protocols.

Senior CSR / Service Revenue Program Lead

MAR 2017 — NOV 2019

Arvato CRM Solutions · Majorel Polska · Kraków, Poland

- Supported advertisers on Google Ads, Analytics, Merchant Center, Tag Manager and Google Partners across phone, email and chat.
- Ran the service revenue program at team level: proactive account management and result tracking.
- Ramp-up lead for new hires — onboarding, training and quality coaching.
- Translated platform mechanics into plain language for non-technical advertisers.

Engineer · Support Engineering Team

AUG 2016 — DEC 2016

Lenovo · Odessa, Ukraine

- Handled Lenovo customer requests directly, from diagnosis through hardware repair.
- Board-level troubleshooting on laptops, including soldering and BGA reballing.

EDUCATION

Specialist Degree — Engineer of Automated Production Control Systems

2010 — 2015

Odessa National Academy of Food Technologies, Ukraine. Full course in automated management of technological processes and computer-integrated technologies.

STACK & TOOLS

- Claude
- Gemini
- GPT
- Ollama
- Open WebUI
- MCP
- Python
- JavaScript
- HTML / CSS
- Playwright
- Docker
- Cloudflare Tunnel
- Caddy
- Git
- Windows / Linux servers
- Fusion 360
- Premiere / CapCut

WAYS OF WORKING

- Systems Thinking
- Trust & Safety
- Policy Enforcement
- Data Analysis
- Onboarding & Training
- Self-hosting
- Documentation

INTERESTS

Taking things apart to see how they work — devices, ad platforms, language models, stories. Building small tools that remove a daily annoyance, then giving them away.

EXPERIENCE (CONT.)

Senior Technical Expert

JAN 2015 — JUN 2016

Citrus Company · Odessa, Ukraine

- Software testing and firmware updates across a wide range of consumer devices.
- Configured software and environments to resolve customer issues end to end.
- Trained new hires and colleagues; supported direct sales with technical expertise.

Senior Service Engineer

JAN 2009 — JUN 2014

KM-Service / Destine Service Centers · Odessa, Ukraine

- Component-level diagnostics and repair of PCs, laptops and office equipment.
- Configured network environments for business and private customers.
- Owned the full repair cycle: intake, diagnosis, repair, testing, handover.

SELECTED PROJECTS

volobado.com

Portfolio site with a custom Three.js particle engine — no frameworks, no builders. Self-hosted on my own server, exposed through a Cloudflare Tunnel.

THREE.JS · GSAP · CADDY

MCP Server Suite

Model Context Protocol servers that give AI agents real hands: Gemini WebAPI, Flux, MicMonster TTS (12 tools), NotebookLM automation.

PYTHON · MCP · PLAYWRIGHT

AutoDubber

Video dubbing pipeline: subtitles in, dubbed track out. Azure Neural TTS and MicMonster back-ends with per-line speed matching.

PYTHON · AZURE TTS

Home AI Server

A spare PC turned into a 24/7 service host: local LLMs on Ollama, a Telegram news bot, remote browser, tunnels — all administered over SSH.

OLLAMA · DOCKER · SSH

Personal Book Reader

Self-hosted replacement for a reading service I stopped trusting. EPUB, PDF, FB2 and TXT, with position memory.

JS · books.42web.io

Book-to-Video Pipeline

Turns a book into a 35-minute video script: source extraction, structural scaffolding, humanising passes, teleprompter export.

LLM ORCHESTRATION · PYTHON

HOW I WORK

- Trace it to the root.** A symptom is a starting point, not the problem. I follow the signal until I can point at the exact place it breaks.
- Automate the boring half.** If a task repeats, it becomes a script. That's where most of my tooling came from.
- Ship, then polish.** A rough working version beats a perfect plan. Everything I build goes live early and gets fixed in daylight.
- Write it down.** Every system I run has a document explaining how to restart it at 3 a.m. — usually for future me.
